**NEW MARANTZ COMPONENTS INTEGRATE SEAMLESSLY
TO CREATE THE “ULTIMATE NETWORKED AUDIO/VIDEO SYSTEM”**

*-- Leading-Edge Components Match Aesthetically, Work Smoothly Together to
Create a Total Entertainment System That’s “Greater than the Sum of Its Parts” --*

Atlanta, GA, September 23, 2010 – Marantz America, a world leader of advanced home entertainment solutions, is showcasing four exceptional new products at CEDIA 2010 that provide custom integrators with a unique opportunity to create the ultimate networked home entertainment system. All four new components, including the **SR7005 A/V Receiver** (SRP: \$1,599), **AV7005 Preamplifier** (SRP: \$1,499), **M-CR603 Network CD Receiver** (SRP: \$699), and **NA7004 Network Audio Player** (SRP: \$799), are designed with sleek matching chassis to integrate seamlessly and provide an unprecedented home entertainment experience. A networked home entertainment system that includes these four components offers not only the highest-quality audio and video performance, but also a host of cutting-edge multi-zone networking and content access capabilities.

Noted Kevin Zarow, Vice President of Sales and Marketing, Marantz America: “These four components combine Marantz’s longstanding heritage of superior sound reproduction with the latest in music delivery technologies. Most importantly, they open up new worlds of potential in home entertainment, A/V distribution and overall enjoyment.

SR7005: “The Heart of the Ultimate System”

The heart of Marantz’s “ultimate A/V system” is the company’s SR7005 7-channel home theater A/V Receiver (125Wx7 - 8 ohms), which offers three-zone, three-source audio distribution capability and unprecedented flexibility and support for high-definition audio and video performance from virtually all digital sources. It includes

six HDMI v1.4a inputs with 3D (all mandated formats) and DLNA v1.5 (Digital Living Network Alliance) compliant, ensuring smooth content sharing among connected devices. The SR7005 incorporates a built-in Internet radio, and offers streaming of popular music sources such as Napster, Rhapsody, and Pandora, as well as image streaming via Flickr. It supports all the latest High Definition multichannel formats, such as Dolby TrueHD and DTS HD Master Audio, along with all the other key audio formats. The SR7005 is also compatible with the Apple® iPod® and iPhone™, via a front-panel USB input. Third party remote control systems such as Crestron, AMX, Control4® are fully supported as well. Notably, the SR7005 features the widest array of post-processing options, including new Audyssey DSX decoding, allowing maximum enjoyment from all audio and video sources. Thanks to its innovative M-XPort and Bluetooth connectivity, users can wirelessly enjoy files from any Bluetooth-enabled source, including mobile and PC sources such as iPhone and iPad collections, through their home theater system.

AV7005 Preamp: Living Up to the Marantz® Audio Heritage

The AV7005 Preamp incorporates both classic features and styling as well as innovative technologies that offer new levels of convenience and flexibility. Fully DNLA 1.5 compliant, it allows smooth integration into the home network, and incorporates a built-in Internet radio, plus streaming of popular music sources such as Napster, Rhapsody, and Pandora as well as image streaming via Flickr. It features 6 HDMI 1.4(3D/Audio Return Channel) inputs, with 2 HDMI outputs, all ready for 3D. A front panel HDMI input allows for easy connectivity of camcorders and video game sources. The unit's M-XPort (Marantz eXpansion Port) delivers Bluetooth reception via the RX101 Bluetooth Receiver (sold separately) and extensive external control options open up new worlds of enjoyment and convenience.

NA7004: Ultimate All-in-One Music Source Component

The Marantz NA7004 is a game changing component that literally serves as a digital-to-analog converter for people with large collections of downloaded high-resolution music on their computers or other external storage devices, who want to listen through their home audio systems. Notably, the NA7004's music reproduction capabilities outperform that of conventional CD players, revealing subtle nuances and

dynamics of high-quality sound that are often lost in file transfer from downloaded music collections, ripped CDs and more. The NA7004 is the solution to better sounding digital music that discriminating listeners have long been waiting for. The NA7004 incorporates a built-in Internet radio, plus streaming of popular music sources such as Napster, Rhapsody, and Pandora. Among its key performance and convenience features are a USB front-panel input for digital connection to the iPod® and iPhone™ and a back panel M-XPort for wireless Bluetooth streaming with optional RX101 Bluetooth Receiver. The NA7004 also includes access to over 14,000 Internet Radio stations. File types supported include FLAC, 96/24FLAC, WAV, WMA, WMA Lossless, MP3, MPEG-4 and AAC. The USB Audio Sample Rate / Word Depth is up to 96kHz / 24bit, and the built-in D/A converter mode provides 3 digital inputs. (COAX, OPTICAL, USB).

M-CR603: All-in-One IP-Based Tabletop Music Distribution System

The Marantz M-CR603 Network CD Receiver offers an unequalled flexibility for a variety of convenient lifestyle-focused music listening/distribution options, content access and system-building capabilities. In addition to its 100-watt digital amplifier and high-performance receiver, the elegantly styled component features a high-quality CD player and AM/FM Radio, plus access to thousands of Internet radio stations, and allows for streaming of popular music services Rhapsody, Napster and Pandora. Because the M-CR603 is IP-based and IP addressable, it provides the ability to easily connect to a home network for streaming and multi-room distribution. As such, it may be used as a zone player for users who already have a receiver-based home theater system in their family room, allowing for easy control of different zones of audio throughout the home. A variety of inputs and outputs, with the option for Bi-amplification, allows for easy system expansion, including the addition of a subwoofer. Features such as a front panel USB input for iPod® add to the M-CR603's convenience and flexibility, and it can also be used as a D/A converter for those who have downloaded music on their PC's for streaming through a home audio system.

**Some services may require a subscription or membership for use.*

A home network is required for the use of certain product features described above.

About Marantz

Founded in 1953, Marantz is a world-renowned manufacturer of premium home entertainment components, committed to upholding the tradition of technological superiority and outstanding performance initiated by founder Saul Marantz. The company's deep roots in audio and legacy of creating some of the world's most respected audio products have earned it a singular reputation for excellence and innovation. Building on this foundation, the three main pillars of the Marantz philosophy today are superior sound quality, impeccable design and total user convenience. Marantz audio and video components are carried by many of the nation's premier audio/video retailers and professional custom installers.
