DENON® DEBUTS SIX NEW HEADPHONES THAT COMBINE ENHANCED AUDIO WITH GREATER IPHONE / IPOD COMPATIBILITY, COMFORT AND CONVENIENCE

-- New Noise-Canceling Model, Easy iPod Control, Plus “Human Factor” Engineering for Ultimate Comfort and Fit, Models for All Tastes and Budgets --

Mahwah, NJ, April 26, 2010 – Denon Electronics, one of the world’s premier manufacturers of high-quality home entertainment components, today introduced six high-performance headphones, bringing the total number of models in the company’s line to 14. The additions include, with expected SRP and availability in parenthesis, the new **AH-NC800** (SRP: TBD, August) noise-canceling headphones, as well as the over-ear Models **AH-D1100** (SRP: \$199, Sept.), **AH-D510R** (SRP: \$99, August), **AH-D310R** (SRP: \$69, August), and the in-ear Models **AH-C560R** (SRP: \$99, June), **AH-C260R** (SRP: \$49, June) . In addition to a host of leading-edge audio technologies for an optimum music listening experience, Denon’s new [line of headphones](#) places a strong emphasis on simple, “one-touch” iPhone/iPod compatibility and convenience, providing users a new level of voice and music control. Notably, four new models (AH-D510R, AH-D310R, AH-C560R and AH-C260R) all feature a specially designed three-button remote control/microphone that provides easy access to both voice and music control, and is compatible with Apple Voice Control, for Apple iPhone 3GS, iPod Touch 2G and the latest generation Shuffle. These also control the new iPad.

Noted Phil Cohn, the company’s Sr. Vice President, Sales & Marketing: “Headphones are one of Denon’s top priorities in 2010. Our comprehensive line of high-performance models provides consumers with the ideal choice for every taste, musical listening preference and budget. Now that music has truly ‘gone mobile,’ there is increasing demand among discriminating consumers for a dramatically enhanced audio experience, as well as total comfort and the convenience of easy iPod/iPhone control and command. Denon is committed to meeting this consumer demand, and setting new headphone standards for performance, comfort and value.”

Critically Acclaimed Comfort and Style, “Human Factor” Engineering

All new Denon headphones are engineered for total comfort and style, with advanced audio technologies for optimum sound. Notably, in order to ensure maximum comfort for all wearers, the company’s new over-ear headphones all benefit from a unique R&D initiative based on precise scientific modeling and anatomical measurements of the human head. The result is a new type of headphone band that is engineered with a “human factor,” leaving virtually no gap between the band and the wearer’s head. In addition, all new Denon over-ear headphones feature newly developed 3D draping soft skin and foam cushion ear-pads for superb comfort and hours of enjoyment without “listening fatigue.” The solid aluminum housing construction of the AH-NC800, AH-D1100 and AH-D510R models adds yet another level of rock solid construction for added durability and style.

Noise-Canceling AH-NC800s Reduce Ambient Noise by 99%

Denon’s luxury-class AH-NC800s headphones feature newly developed dual noise-cancelling technology (feed-back and feed-forward) that reduces ambient noise by 99% for a new level of quiet and music enjoyment. In addition, the sophisticated headphones feature Denon’s proprietary Compressed Audio Restorer, an audio-enhancing technology that restores musical nuances and subtleties, reproducing music the way the recording artists and producers intended it to be heard. Previously only available in the company’s advanced audio/video receivers and AH-NC600 in-ear headphone, this leading-edge circuitry improves the dynamic range and sound quality of compressed audio sources. Superior audio reproduction is further enhanced by high-quality 40mm drivers, as well as OFC cables with gold-plated straight plug connector. The new headphones come with a new specially designed low-profile carrying case for easy portability of the phones and all accessories.

In-Ear Models Feature Ergonomic Design, Sound Isolation Technologies

Denon’s new in-ear headphone models all feature an ergonomic design that isolates the ear more steadily and comfortably, and also decreases mechanical vibration. A newly developed Hybrid (metal or plastic combined with Elastomer) housing ensures clean sound, and a Radial Cascade Damper (in models AH-C260R and AH-C560R) reduces noise from touched cables. For total flexibility, all models come with multiple sizes of comfortable ear tips, extension cables and ear clips to ensure perfect fit for every listener. The AH-C560R headphones include not only

three sizes of silicon ear tips, but also a special “soft-foam” earpiece for added comfort and luxury, while the AH-C260R comes with 4 sizes of silicon ear tips, one being an extra small to fit younger users. They also come with a new specially designed carrying case that features cable management, as well as OFC (oxygen free copper) cables for enhanced sonic performance.

Denon’s Full Line of Advanced Headphones

The new headphones will join Denon’s Models **AH-NC600** (SRP: \$199) in-ear noise cancelling headphones, **AH-C710** (SRP: \$149), **AH-C452** (SRP: \$69) and **AH-C360** (SRP: \$49) “earbud” in-ear models and the compact on-ear model **AH-P372K** (SRP: \$59); as well as three state-of-the-art over-ear models, the **AH-D7000** (SRP: \$999), the **AH-D5000** (SRP: \$699) and **AH-D2000** (SRP: \$349).
