DENON DJ UNVEILS THE DN-MC6000 FULL MIXER / 4 DECK MIDI CONTROLLER

— Company launches full-blown mixer / MIDI controller, with four-deck/four-channel mixer control with built-in soundcard and microphone effect, and the ability to control DJ software for PCs through USB —

ITASCA, IL, August 16, 2010 — [Denon DJ](#), a leading manufacturer of premium-grade DJ equipment, introduces the **DN-MC6000 Mixer and MIDI Controller**, a four-channel/eight-source standalone digital DJ mixer with MIDI interface and internal sound card. With an astounding amount of features, real-time channel matrix operation, slim tabletop design, state-of-the-art solid steel chassis construction and quality sound, the DN-MC6000 is one of Denon DJ's flagship controllers. Also acting as an audio interface (with a 2 in/2out stereo soundcard included), the DN-MC6000, when paired with the user's software of choice, is a turnkey control solution for mobile DJs and party DJs, and a clear centerpiece to any DJ rig.

It comes bundled with [Virtual DJ](#) LE, Audio/Video/Karaoke mixing software in North/South America and Canada, and Native Instruments® TRAKTOR™ LE for Europe and Asia. The DN-MC6000 is MIDI-mappable and compatible with other popular DJ programs. The unit interfaces seamlessly with Mac® OSX and Windows XP, Vista and Windows 7 operating systems. Unlike other comparable products, the DN-MC6000 includes a selectable Video/Audio control cross fader feature. Each side of the unit can control up to two decks (for a total of four), with visible deck color change for intuitive, straightforward operation. Also notable is the fact that the DN-

MC6000 is a real mixer, able to process audio inputs for external devices without a connection to a computer, as a dedicated mixer unit would.

Key features include rack-mountability (with included 19" rackmount accessory kit), a number of on-board MIDI effect controls, durable construction, intuitive layout, dual jog wheels, pitch fader, channel fader, cross fader and much more. The unit's Pitch/Fader/Volume lock function holds the last known Audio value and position until the NULL point is again reached. It is also easy for users to find where they are going, with the included File browse navigation keys and rotary encoder file selector knob with illuminated ring. Also featured are the unit's high-quality, high-output headphone amp, the independent 3-band Channel EQ with "Kills" (high-mid-low) and various Utility presets to customize user settings.

Other features include:

- New, 3-way powerful audio/video-assignable cross fader (Audio, Audio/Video, Video)
- Newly designed, high-resolution 105-mm touch-sensitive jog wheel
- Smooth 100-mm long pitch slider with high 14-bit resolution
- Eight (4 + 4) hot cue/sampler buttons with dual bank selector key
- Auto loop button with Beat Jump (loop cut)
- Manual loop In/Out buttons
- Large-size Cue & PLAY buttons
- EFX controls, EFX keys and Parameter knobs
- Multiple GUI controls – Mixer, Video, Scratch, Sampler, REC, etc.
- Powerful Shift key – used for various dual-button operations
- Search keys, to advance around within a file
- Denon's legacy "Pitch Bend" keys
- Vinyl and Pitch Bend Jog modes
- SYNC key for beat matching between decks
- Key Lock on/off button with LED confirmation
- Matrix Input Assignment selector knob
- Selectable PFL input gain and program meters
- Independent CUE system (all channels)
- Split Cue function with Cue/Master pan knob
- 45-mm Channel and Cross Faders

- Independent Channel A-B Thru switch (cross fader)
- Cross Fader contour adjustment
- Master Output stereo/mono switch
- Booth Output with Source Selector and level control
- Mic 3-band EQ (High-Mid-Low) for mics 1 and 2
- Mic Ducking and built-in Echo Effect for mics 1 and 2
- MIDI-mappable control surface (faders, knobs and buttons) for other DJ applications

Inputs include two RCA/Phono lines, one XLR Mic/quarter-inch one quarter-inch TRS Mic jack, and two RCA AUX inputs. Outputs include balanced master XLR, unbalanced master RCA, quarter-inch TRS booth/send out, RCA record out, and stereo headphone out. The DN-MC6000 also has a USB Audio in/out selectable routing switch and a Kensington lock security feature. The unit measures 18.1" x 2" x 10" without rack ears. Power input is AC 100V – 240V, 50/60 Hz, and output is DC 12V, 3A. AC adaptor power supply and 1.5-meter USB cable are included, and the unit also features a green, energy-saving ECO standby mode.

The DN-MC6000 will be available fall 2010 with a U.S. MSRP of \$949.99. For more information, please visit www.denondj.com.

About Native Instruments

Native Instruments is a leading manufacturer of software and hardware for computer-based music production and performance. The company's mission is to develop innovative, fully integrated solutions for all professions, styles and genres. The resulting products regularly push technological boundaries and open up new creative horizons for professionals and amateurs alike. Native Instruments opened up the fascinating world of real-time sound synthesis on standard computers in 1996, and today offers an extensive product range for producers, musicians and DJs. The company currently employs more than 200 people in its two offices in Berlin and Los Angeles, and works closely with more than 40 international distribution partners to ensure its future growth and success.

About Atomix / Virtual DJ

Atomix Productions was founded in France in 2000 by Stephane Clavel. The head product of Atomix Productions is Virtual DJ, a computer software that lets the DJs mix by using a computer instead of traditional turntables. This software, used as much by professional DJs in their work as by teenagers for pleasure, is built on a technology invented by Stephane Clavel in 1997, which makes it possible for the computer to automatically synchronize two pieces of music together.
