DENON DJ EXHIBITS DN-S700 TABLETOP CD/MP3 DISC PLAYER

WINTER NAMM SHOW, ANAHEIM, CA, January 14, 2010 — [Denon DJ](#), a leading manufacturer of reliable, premium-grade DJ equipment, is exhibiting its new [DN-S700 Tabletop CD/MP3 Disc Player](#). The DN-S700 is a new entry-level compact tabletop CD/MP3 player sporting many features from Denon DJ's flagship professional models, including advanced MP3 functionality for easy file search and selection, CD text display, auto or manual BPM, three onboard FX, four pitch ranges, hot start and seamless loop controls, fader start and pitch bend (available on buttons and jog wheel to enhance performance creativity). All of these design features and functions provide hobbyists, true mobile entertainers and today's aspiring DJs unprecedented creativity and showmanship opportunity at a groundbreaking price.

The DN-S700 has been implemented with new powerful DSP and large memory capacity, which allows for many advanced features.

MP3 Playback

The DN-S700 can read, display and play MP3 files written to CD-Rs providing DJs with the ability to store more music on a single media or for extended playback time. Files can be searched for easily either manually, or by scanning or using a number of file search functions, including File search and File/Folder search. Additionally, MP3 ID3 tag information can be viewed on the display.

Hot Start

The Hot Start function lets users start playback immediately from a set point within a specific file, determined by the user.

Seamless Loop

With this function, any section on a disc can be played repeatedly between A and B points with no break in sound or limit in length. The DN-S700 has a variety of looping options such as Exit and ReLoop.

Effects

The DN-S700 also supplies the DJ with three different types of audio effects to enhance creativity and performance. ECHO adds a delayed sound that's synchronized by the BPM; with FLANGER, the feedback time and feedback gain can be selected; and the FILTER effect performs a frequency filter sweep as the jog wheel is turned.

Pitch Control / Key Adjust

Playback speed is adjusted with a PITCH slider. Adjustable pitch ranges are +6%, +10%, +16%, +100% (selectable live). KEY ADJUST keeps the original key even if the pitch playing speed is changed with the PITCH slider.

Digital Output

The digital output for the Main output provides a true 100% digital signal without any restrictions or limitations regardless of pitch change or mode setting.

Other Features

- Fader Start
- CD-Text Display
- Auto / Manual BPM Counter
- Pitch Bend via Buttons or Jog Wheel
- Firmware Upgradeable

The Denon DJ DN-S700 Tabletop CD/MP3 Disc Player is now available with a U.S. MSRP of \$499.99. For more information, please visit www.denondj.com.
