## DENON Extends Audibility Limits

### New Small-scale Surround Sound Speaker System DHT-FS5

May 5th, 2008 - The DHT-FS5 is a home entertainment system that offers exciting 5.1 channel surround sound in only one unit. The latest DENON evolution provides room-filling sound, but without room-filling electronics or multiple speaker boxes. Six carefully balanced loudspeakers are precisely aimed to send sound into the room, providing an amazing surround sound experience without the need for multiple, bulky speaker boxes.

**X-Space Surround** technology decodes the original multi-channel audio soundtrack in **Dolby Pro Logic II**, **Dolby Digital** and **DTS** using sophisticated processing algorithms and allows the DHT-FS5 to deliver an unbelievable, room-filling surround sound experience for listeners anywhere in the room. Unlike other home entertainment systems on the market, no reflexion is needed so that the DHT-FS5 is universally applicable.

**High-quality full band speakers** provide maximal speech intelligibility and thus create the illusion to stand in the middle of action - as well in the very dramatic scenes. An integrated **virtual subwoofer with 3 bass reflex tubes** generates clean and controlled low bass. In addition, the **Super Dynamic Bass** technology provides the adequate potency for thrilling entertainment.

The **slim, elegant cabinet** establishes a new understatement conceding attention to paramount home entertainment in authentic **theatre surround sound**. The DHT-FS5 can be easily mounted on a shelf in a TV cabinet or even mounted directly to the wall underneath a wall-mounted TV and thus seamlessly fits in every lifestyle.

The DHT-FS5 allows for a concentration on the essential: **Plug n Play Installation** supersedes exhausting sound calibration while **3 room dimensions** still can be chosen in order to attain optimal sound impression. Furthermore, (enjoying your favourite movies and shows in surround sound and at the same time being considerate of other people sleeping in your house is no longer a contradiction:.) The **Night Mode** allows for surround sound at low volume. The remote control includes input selection and **multiple surround sound mode options** (Movie, Music, Stereo, News) for adequate sound in every situation.

The DHT-FS5 will be available at the end of May in an attractive black or silver finish.
